GEO-STAB™ - THE FASTEST WAY TO INSTALL HEAT PUMP LOOPS WITHOUT FAIL

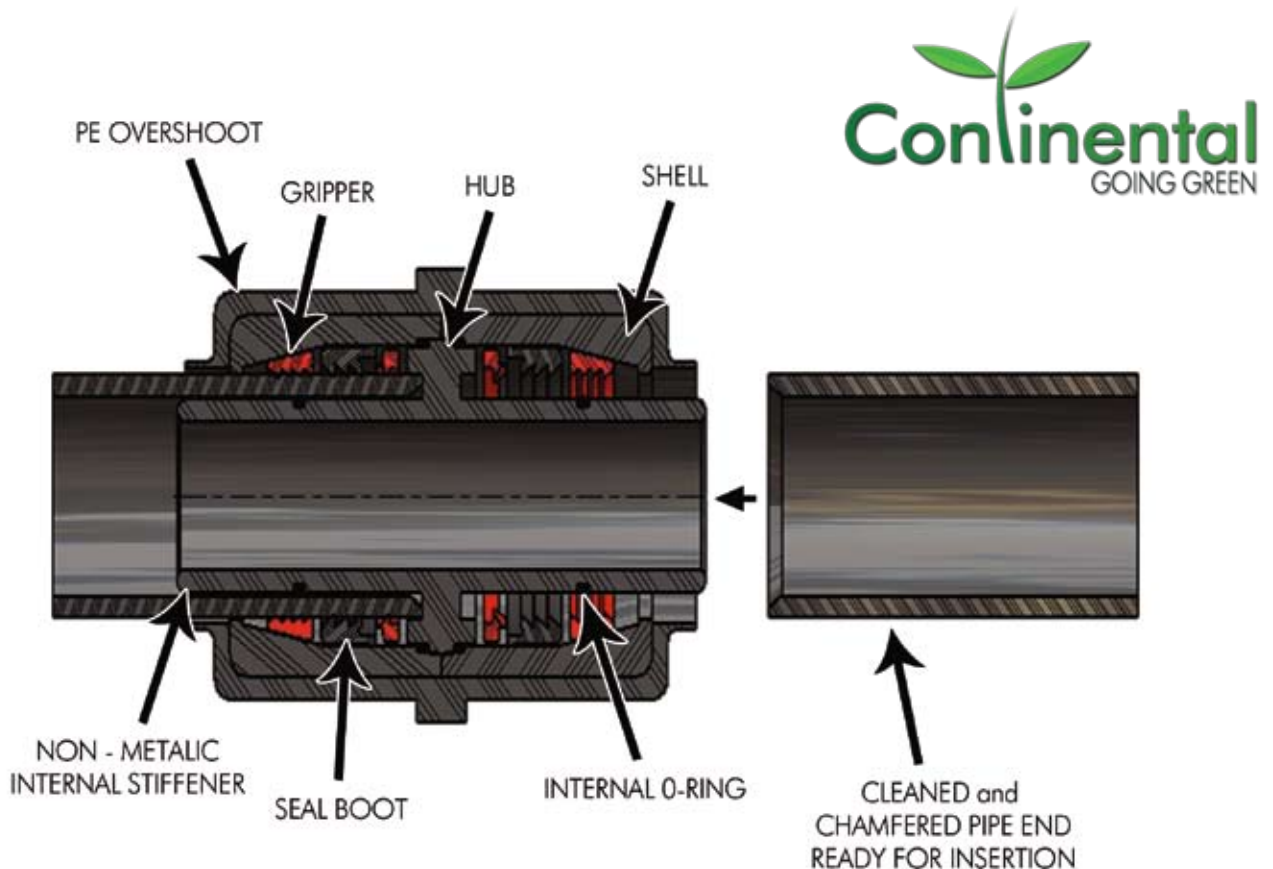

The GEO-Stab™ fitting provides a reliable, productive, and efficient approach to loop installation for the geothermal heat pump industry. The GEO-Stab™ fitting system incorporates an advanced and proven fusionless technology, fully engineered for geothermal heat pump applications. This system is designed to greatly reduce installation time at the job site and the GEO-Stab™ fitting joints are designed to be stronger than the pipe itself!

A NEW SYSTEM FOR A PROVEN APPLICATION

The GEO-Stab™ fitting features an INTERNAL SEAL and is an all plastic fitting that contains no metal parts.

THE GEO-STAB™ IS A COST EFFECTIVE JOINING METHOD

There is no additional assemble equipment required for installation - just chamfer the pipe and stab. That's all there is to it! The GEO-Stab's uni-body design eliminates all external parts. The result is a continuous external HDPE body construction that provides for continuity of material throughout the ground loop system. This simplistic design has been pressure rated to 160 psi and results in a joint that is stronger than the pipe itself.

GEO-THERMAL SERIES

GEO-STAB™ COUPLING

PART #	COUPLING			PKG.D.
	Normal Size			
P000-01-0077-54	3/4"	IPS	DR 11	10
P000-01-0077-55	1"	IPS	DR 11	10
P000-01-0077-56	1 1/4"	IPS	DR 11	10

GEO-STAB™ 90 DEGREE ELBOW

PART #	90 DEGREE ELLS			PKG.D.
